NOTICE

Verco PunchLok[®] System

To Our Valued Customers and Construction Industry Professionals:

The purpose of this notice is to advise that as of April 30, 2015, Verco will no longer be offering the original Verco Punchlok[®] System and instead will be utilizing the new Verco Punchlok[®] II System.

It has been Verco's history for 50 years to develop and improve our products for the construction industry and the Verco PunchLok[®] II System demonstrates our continuing commitment to this effort. The original Verco PunchLok[®] System revolutionized the structural steel decking industry when it was introduced in 2002. Our continued effort to improve our products led to significant tool improvements and increased connection performance with the introduction of the Verco PunchLok[®] II System. IAPMO UES Report ER-0217 provides recognition of the Verco PunchLok[®] II System under the 2009 and 2012 IBC as well as the 2013 California Building Code (CBC).

The new PunchLok[®] II tool and the method of using it are the subject of U.S. Patent No. 6,212,932, U.S. Patent No. 6,397,469 and /or U.S. Patent No. 8,667,656.

We recognize that several building projects may be at different stages of design and construction utilizing our original Verco PunchLok[®] System. Verco Decking, Inc. is committed to assisting the design and construction community to convert any existing projects utilizing our Verco PunchLok[®] System to our new Verco PunchLok[®] II System. Please note, due to updated diaphragm design values for the new Verco Punchlok[®] II System, as shown in IAPMO report ER-0217, design review, resubmittal and approval may be required in order to utilize the new Verco PunchLok[®] II System.

Please do not hesitate to contact your local Verco representative for any assistance you may need in evaluating this change.

Sincerely,

Verco Decking, Inc.
a Nucor company
